BLOOD POISON. victim is firmly within the grasp of the mouster before the true nature of the disease is known. In other cases the blood is quickly filled with this poisonous virus and the Wrecks,

is known. In other cases the blood is quickly filled with this poisonous virus and the awollen glands, mucus patches in the mouth, sores on scalp, ulcers on tongue, sore throat, emptions on skin, copper colored splotches, and falling hair and eyebrows.

Doctors still prescribe mercury and potash as the only cure for Blood Poison. These poisonous minerals never yet made a complete and permanent cure of Contagious Blood Poison. These poisonous minerals never yet made a complete and permanent cure of Contagious Blood Poison. These powerful minerals produce mercurial rheumatians and the most offensive sores and ulcers, causing the joints to stiffen and finger nails to drop off. Mercury and potash make wreoks, not curos, and thore who have been dosed with these drugs are never after free from aches and pain.

S. S. S. acts in an entirely different manner, being a purely vegetable remedy; it forces the poison out of the system, and instead of tearing down, builds up and invigorates the general health. S. S. S. is the only antidote for this specific virus, and therefore the only cure for Contagious Blood Poison. No matter in what stage or how hopeless the case may appear, even though pronounced incurable by the doctors, S. S. S. can be relied upon to make a rapid, permanent cure. S. S. S. is not a new untried remedy; an experience of nearly fifty years has proven it a sure and unfailing cure for this disease. It is the only purely vegetable blood medicine known.
